Education

Carnegie Mellon University

08/2018 - 12/2022

Bachelor's of Science in Electrical and Computer Engineering

- Structure and Design of Digital Systems
- Logic Design and Verification
- Web App Development
- Intro to Embedded Systems
- Principles of Imperative Computing
- Fundamentals of Embedded Control

Experience

Bloomberg L.P

07/2024 - Present

Software Engineer

- Contributed to the front-end of the data-intensive Sell-Side Order Execution (SSOX) application, using TypeScript and C++ to support order negotiation globally, managing a vast number of unique securities and orders.
- Support distributed systems and observability tooling to enhance client performance, stakeholder visibility, and operational resilience across a global user base.

Boeing

03/2023 - 04/2024

Software Engineer

- Developed automated UI integration tests using Selenium for web applications which significantly improved code base test coverage
- Developed Virtual Machine devices for the High Fidelity Digital Twin Program

Intuit

05/2021 - 08/2022

Software Engineering Intern

- Developed a containerized GraphQL Proxy Service using Typescript, Docker, and Redis for optimization, that protects API services from potentially malicious incoming requests using rate limiting and static query analysis
- Developed new feature for the ArgoCD project that allows non-admin users to safely create Applications and Projects for themselves within a Kubernetes cluster.

23andMe

07/2020 - 09/2020

Software Engineering Intern

- Developed user interface for internal hosting service with the Application Infrastructure Team
- Built Flask app that uses Flask API endpoints to display information about applications (statuses, teams, owners, authentication tokens, etc.)

Projects

ArgoCD AppSource Controller

05/2021 - 08/2021

Golang Kubernetes ArgoCD

- Kubernetes Custom Resource Definitions that gives under-privileged users permission from admins to create ArgoCD applications automatically
- Supports multiple ArgoCD Project "profiles" that limit what actions sub-users can make with their application.
- Adopted as a part of the argo-proj-labs collection of vetted community projects
